Overview

Live Spin A Win is a new type of a studio live game, available both on Desktop and Mobile. The dealer spins a wheel that contains a set of numbers and several bonus Multiplier sectors and players can bet on which of the 54 sectors will come next, choosing out of the six different main betting positions: 1, 2, 5, 10, 20 and 40, two Multipliers (x2 and x7), or an additional set of Side Bets: Odd, Even and Multiplier.

Game flow and Rules

- If a game round is in progress when a player enters the table, they need to wait for the next one, and then, place the bets.
- There are several ways to place bets in Live Spin A Win. The payouts for all the bets are listed in the Payout table. Winnings depend on the total amount of the bets and the result that comes on the wheel.
- Bets on any of the following main positions can be placed: 1, 2, 5, 10, 20 and 40.
- There are two Multiplier positions on the wheel: x2 and x7. In case the result is Multiplier, the bets remain as is and the dealer spins the wheel again during the same gaming round to determine the winning number.
- In case the round result is Multiplier several times in a row, players win several multiplications: the result of the winning round is multiplied by all the multipliers from the previous consequential spins.
- The winnings are limited to $ 500 000 (or an equivalent in the local currency of a player).
- The time for placing the bets is limited. The timer in the game window shows how much time is left until the end of betting time of this game round.
- Winnings are paid for the winning bets at the end of each game round.

Side Bets

There are three available Side Bets in Live Spin A Win: Odd, Even and Multiplier. Each bet covers a different set of numbers and has a different distribution. You can place a Side Bet without placing a main bet.

- The Odd Side Bet wins if the result of the round is: 1 or 5.
- The Even Side Bet wins if the result of the round is: 2, 10, 20 or 40.
- The Multiplier Side Bet wins if the result of round is: Multiplier x2 or Multiplier x7.

Notes:
• If a Multiplier Side Bet was placed and the result was Multiplier, the player receives the winnings at the end of the game round, when a resulting winning number is determined.
• If the result is Multiplier the Odd and Even Side Bets lose.
• In case of several consequential Multiplier results in a row, the Multiplier Side Bet wins only once.

Return to Player

The theoretical percentage return to player (RTP) in Live Spin A Win is 97.22% (90.67%-97.22%)

**Golden Chips**

are bonus chips that are awarded to you in certain table games. Each Golden Chip has a specific value and can be used for betting like a normal chip.

If the Golden Chip menu is available on the dashboard, it means that you have Golden Chips available for you to use in the current game.

The Golden Chip menu displays the value and the amount of the Golden Chips available in each particular game. If you have been awarded Golden Chips of different value, the menu lists all chip values and their amount. Chips of the same value from different bonuses are added up.

The **Info** button opens a pop-up with more information about the Golden Chips.

**Golden Chip**

To bet using the Golden Chips, first select the desired Golden Chip value and then place a bet as normally. The remaining amount of Golden Chips decreases respectively.

Note that:

- Golden Chips are only accepted as initial bets in the game. Any following activities, such as doubling, shall be deducted from your Real Money balance.

- In card games, you cannot place a Golden Chip and regular chips on the same bet position simultaneously. However, you are welcome to mix a Golden Chip with a Real Money bet in all Roulette games.
• You can bet only one Golden Chip in each game round. This means that in multi-hand games, the Golden Chip can be placed on one hand only.

In the case of a Tie or Push, your bet Golden Chip will be returned to you.

When your Golden Chip bet wins, the value of the winning Golden Chip is deducted from your win amount.

All game rounds that are played using Golden Chips are also distinguished in game history with the corresponding (GC) icon.
